Reserves at US\$1,200/oz Au and US\$17.00/oz Ag

Notes:

Reserves have been estimated using a gold price of US\$1,200/ounce and a silver price of US\$17.00/ounce;
 Metallurgical recoveries for gold and silver are 93% and 88% respectively;
 Gold equivalent ounces were calculated based on one ounce of gold being equivalent to 74.60 ounces of silver;
 Mineral Reserves were estimated at a cutoff grade of 0.288 Au opt and an incremental cutoff grade of 0.09 Equivalent Au opt;
 Mine losses of 5% and unplanned mining dilution of 10% have been applied to the designed mine excavations.

Resources at US\$1,400/oz Au and US\$19.83/oz Ag

Notes:

Mineral resources have been estimated at a gold price of US\$1,400/troy ounce and a silver price of US\$19.83per troy ounce;
 Mineral resources have been estimated using metallurgical recoveries for gold and silver of 94% and 92% respectively;
 Mineral resources have been estimated at a grade thickness cut-off grade of 0.974 Au equivalent opt-feet and a diluted Au equivalent cut-off grade of 0.228opt;
 Gold equivalent ounces were calculated based on one ounce of gold being equivalent to 72.12 ounces of silver;
 The minimum mining width is defined as four feet or the vein true thickness plus two feet, whichever is greater;
 Mineral resources include dilution to achieve mining widths and an additional 7% unplanned dilution;
 Mineral resources include allowance for 5% mining losses;
 Mineral resources are inclusive of mineral reserves;
 Mineral resources, which are not mineral reserves, do not have demonstrated economic viability. The estimate of mineral resources may be materially affected by environmental, permitting, legal, title, socio-political, marketing, or other relevant factors;
 The quantity and grade of reported inferred mineral resources in this estimation are uncertain in nature and there is insufficient exploration to define these inferred mineral resources as an indicated or measured mineral resource and it is uncertain if further exploration will result in upgrading them to an indicated or measured mineral resource category;
 The underground Mineral Resource is exclusive of the open pit Mineral Resource.

Open Pit Mineral Resources

Resources at US\$1,400/oz Au and US\$19.83/oz Ag

Notes:

Mineral resources are calculated at a gold price of US\$1,400 per ounce and a silver price of US\$19.83 per ounce;
 Metallurgical recoveries for gold and silver are 65% and 30%, respectively for oxide mineralization and 60% and 25% respectively for mixed mineralization;
 One ounce of gold is equivalent to 152.94 ounces of silver;
 Mineral Resources include 10% dilution and 5% mining losses;
 Cut off grades for the Mineral Resources are 0.01opt AuEq opt;
 Mineral Resources which are not Mineral Reserves have not yet demonstrated economic viability. The estimate of mineral resources may be materially affected by environmental, permitting, legal, title, taxation, sociopolitical, marketing, or other relevant issues;
 The quantity and grade of reported Inferred Resources in this estimation are uncertain in nature and there has been insufficient exploration to define these Inferred Resources as an Indicated or Measured Mineral Resource and it is uncertain if further exploration will result in upgrading them to an Indicated or Measured Mineral Resource category;
 The open pit Mineral Resource is exclusive of the underground Mineral Resource.

Reserves at US\$1,200/oz Au and US\$17.00/oz Ag

Notes:

Mineral Resource is inclusive of Mineral Reserve;

Mineral Reserves have been estimated with a gold price of \$1,200/ounce and a silver price of \$17.00/ounce;

Metallurgical recoveries for gold and silver are 92% and 60% respectively;

Gold equivalent ounces are calculated based on one ounce of gold being equivalent to 108.24 ounces of silver;

Mineral Reserves are estimated at a cutoff grade of 0.310 AuEq opt and an incremental cutoff grade of 0.052 AuEq opt;

Mine losses of 5% and unplanned mining dilution of 10% have been applied to the designed mine excavations;

Mineral Reserves are contained in the Mineral Resource estimate previously reported on June 21, 2017.
